WHAT IS SKYTRUST?

Skytrust is a leading cloud-based compliance risk management system software platform delivering substantial cost savings to your IT ownership and maintenance, increased productivity through automation and simplified business processes, providing the ability to scale up and enhance savings.

WHY SKYTRUST?

There are many reasons to move to Skytrust...

as an integrated management system, Skytrust incorporates a corporate, process and plant management risk-based approach

functional tools including risk management, inductions, inspections & audits, asset & plant management, injury management, subcontractor management, project management and HR process all on one platform

provides the ability to meet compliance needs and due diligence across all aspects of a business

aligns with the ISO Standards (ISO 9001 (Quality), ISO 14001 (Environmental), ISO 45001 (Safety), ISO 31000 (Risk) & ISO 22000 & HACCP (Food Safety), Australian Standards AS 1885.1 (Workplace Injury) and WHS legislation

provision of ongoing updates, maintenance, and IT security

Australian-based support team

a three-month trial at no cost, no obligation and no commitment

Skytrust has minimal upfront costs with a monthly subscription and no lock-in contracts.

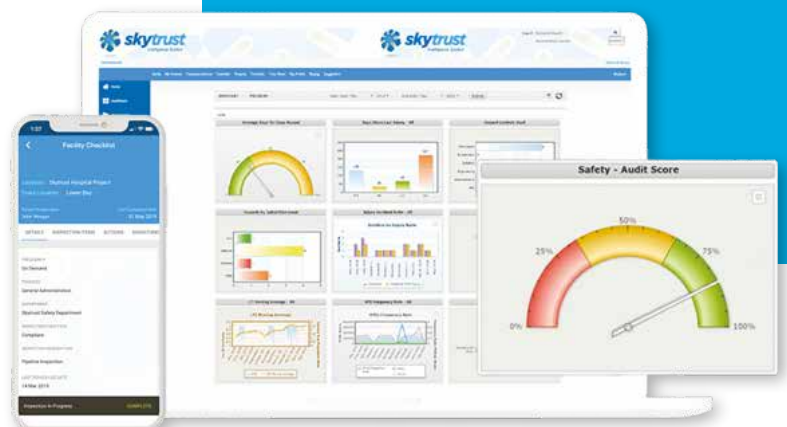

ABOUT US

Skytrust is an Australian software development company located in Adelaide, South Australia. Commencing operations in 2005, developing and implementing compliance risk management software throughout a number of organisations with now over 200,000 users across 20+ countries.

The dynamic locally based Skytrust team consist of highly specialised program engineers, qualified safety and risk professionals and a dedicated customer service team providing exceptional and prompt after-service support to our clients. Our corporate structure reflects a professional, passionate team who continues to develop technological capabilities and works in close unison with Skytrust clients.

Our diverse client base incorporates all industry sectors including construction, civil construction, mining, oil & gas, Defence, manufacturing, local government, education, food, health, aged care, disability support, agriculture, and facility management (just to name a few) collaborate with us to continually innovate and enhance a platform with advanced technologies and functionalities at a realistic and competitive price-point.

Whether you are a small family business or a larger multi-tiered business, the Skytrust team can successfully migrate and implement an integrated compliance risk management software platform to meet your needs.

ENSURE YOUR COMPLIANCE WITH SKYTRUST

REAL-TIME REPORTING AND MONITORING

The Skychart Dashboard is a visual, live dashboard of critical business risks and information. This automatically updates in real time as other parts of the system are updated. It is fully drillable; click on a graph and the system will drill into greater detail for business transparency. Various dashboard options are available to ensure your dashboard is customised for complete efficiency. Performance manage your organisation through visual indicators and thresholds. Base your business decisions on real-time accurate information.

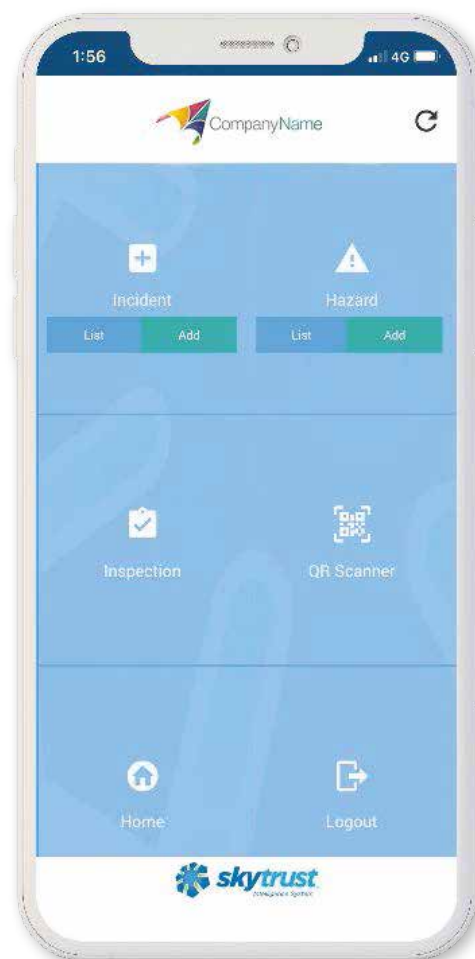

Find our App on the Apple Store & Google Play.

CAPTURE YOUR SAFETY DATA EFFICIENTLY. ANYWHERE, ANYTIME.

Skytrust is available on all modern browsers on any desktop PC, laptop, tablet or iOS/ Android device. The Skytrust App provides offline capability making it possible to easily add Incidents and Hazards as well as carry out any required inspections and the added ability to scan custom QR codes to view information relating to your plant & equipment register. The Home button also dovetails neatly into your Home Tile page, providing a seamless transition into the full version of Skytrust, using access privileges.

Scan the QR code and head straight to the SKYTRUST website for more information.

WE GROW AS YOU GROW

Skytrust is all about standardisation with flexibility and scalability capabilities. Build on Skytrust modules over time as required by your business needs.

Plus, more...

INSTANT HAZARD & INCIDENT REPORTING

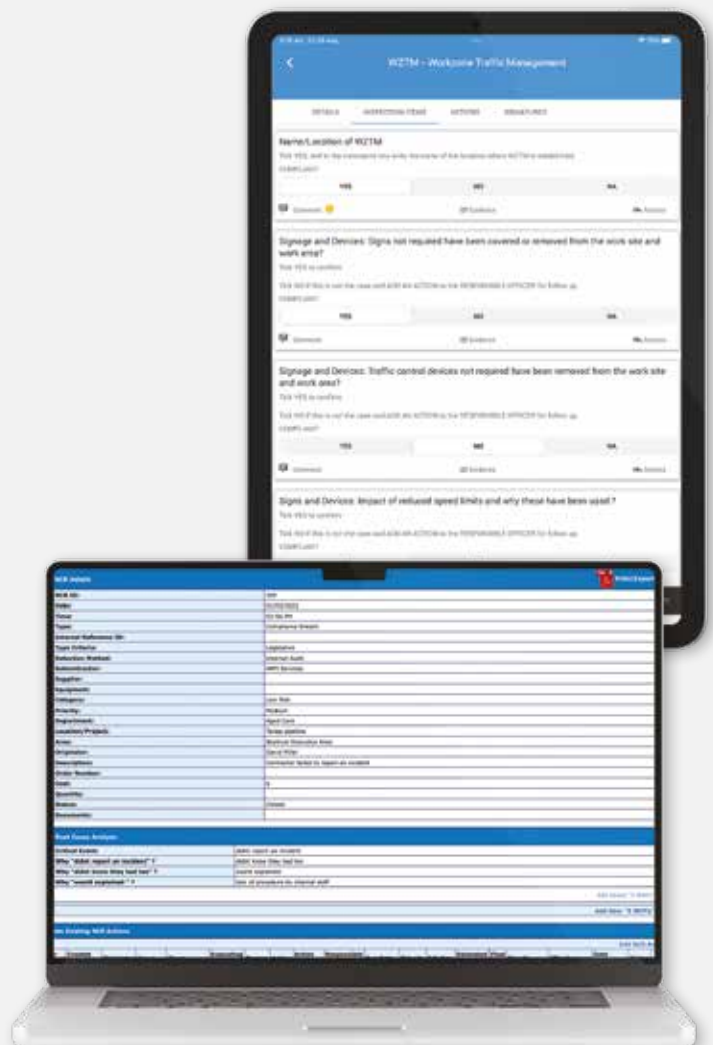

Skytrust allows for real-time hazard and incident reporting for your business on any device allowing for complete oversight and visibility of any events that have occurred. Upload key documents to provide evidence and photos relating to the injury, impact or damage. Record, monitor and investigate injuries..

STREAMLINE YOUR INSPECTIONS

Skytrust provides for an efficient end-to-end inspection process which can be carried out on any device. Create and schedule specific inspections to be performed when required. Add photos for greater transparency.

NON-CONFORMANCE MANAGEMENT

Within Skytrust's Quality Module, utilise formal ISO 9001 process orientated non-conformance reporting which allows for analysis of the non-conformance, uploads of photos and documents, remedy management and tracking of effectiveness of changes implemented.

HR

Skytrust's Human Resources module allows for full HR profiles on each employee, including job titles & training, what incident's they've reported, personal documents and health information.

Track your organisation's training requirements, including any mandatory updating requirements with automatic email notifications and real-time monitoring via the dashboard.

The image shows an employee card on the left and a laptop displaying the Skytrust HR dashboard on the right. The employee card for David Miller includes a photo, QR code, and contact information. The laptop screen shows a table of training records for David Miller.

The QR code on the employee card enables training records to be accessed.

JSA/SWMS

Create your own JSA and SWMS templates with defined risk assessments for each job step.

PLANT & EQUIPMENT

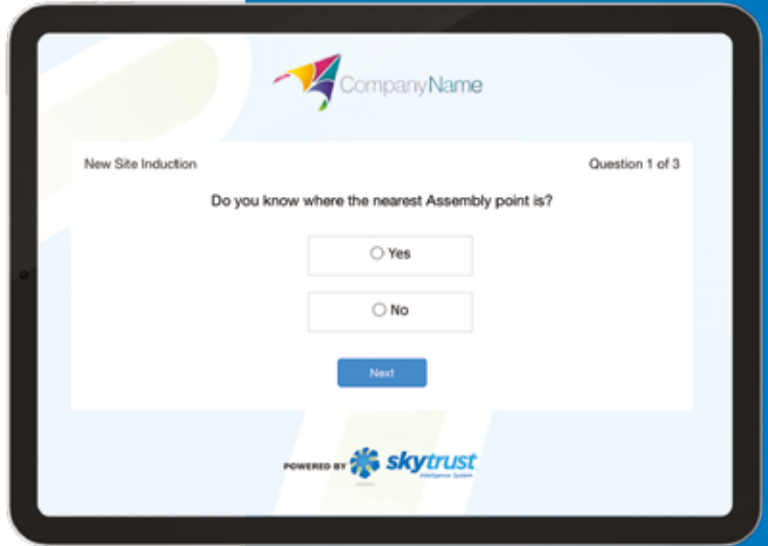

Maintain an easily searchable register suited to your business for all plant and equipment. Store calibration and maintenance requirements (including testing and tagging) to ensure you never fall behind. Receive automatic email notifications for upcoming maintenance and monitor in real-time via the dashboard. Search and filter by department, location, keyword and status and allocate equipment to employees to track and monitor. Skytrust automatically generates QR codes to individual P&E items to enable maintenance staff to utilise QR codes in the field and access plant information instantaneously.

Activity	Task	Preparation	Execution	Completion
Site preparation	Clearing site of debris and vegetation	✓	✓	✓
Site preparation	Establishing site boundaries and safety zones	✓	✓	✓
Site preparation	Establishing site boundaries and safety zones	✓	✓	✓
Site preparation	Establishing site boundaries and safety zones	✓	✓	✓

Item ID	Description	Location	Status	Next Maintenance
101	Excavator	Site A	Active	15/08/2024
